DETAILED ACTION

Election/Restrictions

1. Claims 1-38 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9/12/06.
2. Claims 39-41 are generic to the species disclosed in the application, but a further restriction may be required if further amendments to the claims are directed toward specific embodiments.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 39-41 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 4,994,069 to Ritchart et al.

Ritchart discloses a method of delivering a space-occupying device (14) to a void in the body using a catheter (10). The device includes a binding agent (36 in Figure 4A) that reduces the flexibility of the device by retaining its linear shape for insertion. Once the binding agent comes into contact with body fluids, the device becomes more flexible and assumes a coiled shape (column 3, lines 14-20 and column 5, line 65).
